

News from the Stars:

OR, AN

EPHEMERIS

For the YEAR 1691.

WITH

*Observations upon the Eclipses, Solar  
Ingresses and Configurations of Heaven  
happening therein.*

Being the Third since the Bissextile, or Leap year

And from the *Creation* of the WORLD,  
according to the best of *History*, 3640 years.

WHEREIN

You have an *Account* of many things about the  
*Heavenly Bodies*, and their *Portents* in the  
said YEAR.

By WILLIAM ANDREWS, Student  
in *Astrology*.

*Deus in adiutorium.*

LONDON

Printed by William Bonny for the Company of  
STATIONERS, 1691.

# Astronomical Observations,

1691.

<b>T</b> HE Eccentricity of the Sun, is	D.	2	2	40
The Obliquity of the Ecliptick		23	31	31
The Precession of the Equinoxes.		29	33	21
The True length of the Tropical Year 365. Days		5	48	53

## The places of the Apogees of the Planets.

<b>T</b> HE Apogee of Saturn is	D.	28	51	23
Of Jupiter		9	6	15
Of Mars		0	14	11
Of the Sun		7	16	37
Of Venus		1	41	19
Of Mercury		3	21	37

## The Ingress of the Sun into the four Cardinal points of HEAVEN.

Aries, March the 10. 76. 24'. A. M.  
 Cancer, June the 11. 96. 41'. A. M.  
 Libra, September the 12. 136. 18'. P. M.  
 Capricorn, December the 11. 16. 47'. P. M.

The *Oriental* and *Occidental*, rising and setting of the 5 Planets; before, and after the *Sun* this present Year, 1691.

**S**aturn is *Oriental*, and a *Morning Star*, at the beginning of this Year, and so continueth untill the 6th. day of May; and then He becomes *Occidental*, and an *Evening Star*, untill the 14th. day of November, and then He is a *Morning Star* again, and riseth before the *Sun*, to the years end.

*Jupiter* is *Occidental* at the beginning of this Year; and an *Evening Star*, and so continueth to the 31st. day of March; and then He becomes *Oriental*, and a *Morning Star*, to the 22th day of October, and from thence He is an *Evening Star*, to the end of the year.

*Mars* is *Oriental*, and a *Morning Star* at the beginning of this Year, untill the first day of December, and from thence He is an *Evening Star*, the Residue of the year.

*Venus* is *Occidental*, and an *Evening Star*, at the beginning of this year, untill the 22th. day of January; then She becomes *Oriental*, and a *Morning Star*, and so continueth to the 5th. day of November, and then She is again an *Evening Star* the rest of the year.

*Mercury* becomes *Occidental*, and an *Evening Star* at the very beginning of the Year, and so continueth untill the 15th. day of February; then He becomes a *Morning Star*, to the 26th. day of April; then He becomes an *Evening Star* again, to the 21st. day of June, then a *Morning Star* again, to the 9th. day of August; then an *Evening Star* again, to the 16th. day of October; then a *Morning Star* again, to the 12th. day of December, and from thence to the year's end, an *Evening Star*.

# Notæ Vulgares:

O R,

Common Notes for this present year, 1691,  
according to both Accounts, viz.

Julian	and	Gregorian.
I	The Golden Number.	I
20	Cycle of the Sun	20
D	Dominical Letters.	D
14	Roman Indiction.	14
II	Epa.	II
22	Number of Direction.	22

## The Use of the Two ensuing Tide-Tables.

**T**O find the time of Full Sea, or High-water, in any of those places mentioned in the two ensuing Tide-Tables you must observe, First the Age of the Moon, which you may easily find in the next following Table, wherein you have the Moon's Age every day throughout this Year 1691. And having therein found out the Moon's Age, according to those directions mentioned for that purpose, in the side of the said Table; then have recourse unto the said Tide-Tables, and look for the place desired, in the Head of the said Tables, with the Age of the Moon, in the Column under the Title of the Moon's Age, and in the Common Angle, or meeting of those Lines, in the Column under your place, you shall have the time of High-Water in hours and minutes.

Yet Note, that the Tides do not always fall out exactly at the time found in these Tables, by Reason of the difference of the Moon's Latitude, High-winds, Lapso-Floods, &c. which very often alter the time, yet this is the exactest Rule that can generally be given for the finding of them.

A TABLE of the Months Age every day throughout  
 this Year, 1691. whereby, with the help of the co-  
 sining Tide-Tables, the time of High-Water, and  
 full Tide, may be found in those places here inserted.

Days	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

# January's Planetary Transactions and Observations, 1691.

The. } is with the ☿

13 day at 10 in the morning	Saturn,
16 day at 9 in the morning	Mars,
19 day at 9 at night	Venus,
20 day at 2 afternoon	Mercury,
23 day at midnight	Jupiter,

**L**ET the Blessings of God be upon us now, and evermore; and may His Judgments be averted. It seems probable, that the Effects of the many Conjunctions of the Planets, in November last past in Scorpio, will appear now, or ere long. — These Conjunctions, seem'd to have very considerable Significations, especially, that of Saturn and Mars, in the Three and Twentieth degree of that Sign. Many things of great concernment seem now in Agitation in several parts of the VVorld. Divers Transactions and Difficulties attend some places in Europe; Robberies, Piracies, &c.—Mars now passeth out of Sagittary, and comes into Capricorn; and the mutual Aspects of the Heavenly Bodies in this Month are these, viz. A Quamile of Jupiter and Mars in Aries and Capricorn, and of Saturn and Mercury in Scorpio and Aquarius: a Conjunction of the Sun and Venus, and of Venus and Mercury in Aquarius; a Sextile of the Sun and Saturn, and of Saturn and Mercury in Scorpio and Capricorn; of the Sun and Jupiter, and of Jupiter and Mercury in Aries, and Aquarius. Martial Negotiations at Sea and Land, &c.—

Cold-Weather often in this Month, with some Snow and Rain &c. —

Full Moon, the 2 day 54 minutes past 9 at night.  
 Last Quarter, the 9 day 12 minutes after mid-night.  
 New Moon, the 81 day 31 minutes past 4 morning.  
 First Quarter, the 25 day 42 minutes past 5 at night.

# February's Planetary Transactions, and Observations, 1691.

The { 9 day at 7 at night *Saturn*,  
 { 14 day at 11 before-noon *Mars*,  
 { 15 day at 8 in the morning *Venus*, is with the }  
 { 17 day at 8 at night *Mercury*,  
 { 20 day at 6 at night *Jupiter*. }

ON the Eighteenth day of this Month of February, about 5 of the Clock in the Morning, there will be an Eclipse of the Sun, in Ten degrees of *Pisces*; but not to be seen of us here in England; this will be a great Eclipse in some Foreign Parts. *Mars* now goes out of *Capricorn* into *Aquarius*, and *Saturn* become Retrograde, at the Mounts end, in the Nine and Twentieth degree of *Scorpio*. There are but very few Configurations of the Stars at this time, viz. only a Quartile of the Sun and Saturn, and of Saturn and Mercury, in *Scorpio* and *Aquarius*: a Conjunction of the Sun and Mercury in *Pisces*, and a Sextile of Saturn and Mars in *Scorpio* and *Capricorn*; and they seem to have pretty moderate Significations. Many Rumours and Reports from places beyond the Seas: The publick concerns of some Nations seem uneasy and of various Natures and Dispositions, and sundry Active businesses seem drawing nigh in some Countries; and now Military undertakings seem managed, and discoursed off, in divers places of Europe.

The weather will be in this Month very Cold, and inclining to Snow, somewhat Wet. &c. now and then.

1691

March hath xxxj. days.

Full Moone the 4 day 28 minutes past 8 Morning.

Last Quarter, the 11 day 33 minutes past 6 at Night.

New moone the 19 day 53 minutes past 7 at Night.

First Quarter, the 27 day 29 minutes past 1 Morning.

# March's Planetary Transfactions, and Observations, 1691.

The { 9 day at 4 in the morning Saturn,  
13 day at 3 afternoon Mars  
15 day at 10 at night Venus.  
17 day at 10 in the morning Mercury,  
20 day at noon Jupiter, } is with the ☾

THE Sun now enters Aries; and the Heavenly Bodies, as touching their Mutual Aspects, are pretty favourably disposed most part of this Month, there being only a Quarile Aspect of Saturn and Mercury, and of Saturn and Venus in Scorpio and Aquarius: A Trine of the Sun and Saturn, in Scorpio and Pisces; a Sextile Aspect of Jupiter and Venus, and of Jupiter and Mars, in Aries and Aquarius; but at the Months end, the Sun and Jupiter are in Conjunction in Aries; and there happens a Quarile Aspect of Saturn and Mars in Scorpio, and Aquarius; whole Effects will be of Importance—Various proceedings in many parts of the World; and matters of Consequence are now carried on, and some Countries and People are employed, and are prosecuting their Affairs with much Vigour and Diligence, tho' endeavours seem to be promoted for the Reconciling of some National differences, and composing some Animosities, and Controversies depending between some European Nations—

Moderate weather in this Month, but some what uncertain, if not sometimes very Moist, &c—

1691.

April hath xxx. days.

Full Moon the 2 day 25 min. past 7 at Night.

Last Quarter the 10 day, 8 min. past 1 Afternoon.

New Moon, the 18 day, 43 min past 9 Morning.

First Quarter, the 25 day 7 minutes past 7 Morning.

# April's Planetary Transfactions, and Observations, 1691.

The { 5 day at 10 in the morning Saturn,  
13 day at 7 at night Mars,  
14 day at noon Venus, } is with the ☽  
17 day at 9 in the morning Jupiter,  
17 day at 1 afternoon Mercury,

THE Conjunction of the Sun and Jupiter, and Quartile Aspect of Saturn and Mars, at the very end of Mareb, or just at the beginning of this Month, are of the greatest consequence, at this time to be considered, as in Relation to their Effects, &c. — There being little or nothing to do, amongst the Planetary bodies now besides; as concerning their Mutual Aspects, &c. — There being now only a Trine Aspect of Saturn and Mercury, and of Saturn and Venus, in Scorpio and Pisces: two Conjunctions, viz. of Jupiter and Mercury in Aries, and of the Sun and Mercury in Taurus: and a Sextile Aspect of Mars and Mercury in Pisces, and Taurus. — The Inclinations and dispositions of some People are for Peace, others for War, and many preparations in divers Places seem tending thereto, &c. — Notwithstanding, if the Negotiations of these times, be of a Calmer Nature than formerly, they may be acceptable enough unto some Countries who for some time past, have been under the Effects of War, and it's Attendants, &c. —

Pray seasonable Weather in this Month, for ought we can discover: Some Cold Storms, &c. therein.

1691.

May hath xxxj. days.

Full Moon, the 2 day 15 minutes past 8 morning.

Last Quarter, the 10 day 40 minutes past 8 morning.

New Moon, the 17 day 31 minutes past 6 at night.

First Quarter, the 24 day 53 minutes past 9 morning.

Full Moon, the 31 day 57 minutes past 7 at night.

May 29th at 2 1/2 past midnight, Venus & Mars, rising O' clock  
May 30th at 3 1/2 past midnight, Venus & Mars, rising O' clock

Considerable Transactions now, both at Sea and Land, in divers parts of Europe, and the publick Affairs of some Nations seem not to be very well composed: sudden Revolutions in the World, &c.—Jupiter now leaves Aries, and comes into Taurus: and Mars comes out of Pisces into Aries. The mutual Aspects of the Planets in this Month herefore, viz. an Opposition of Saturn and Mars, at the Beginning thereof, by the most correct Tables (though according to Agul, at the end of the other Month) and an Opposition of the Sun and Saturn at Taurus and Scorpio, viz. the Aspects of Saturn and Mars, in Pisces and Aries, & Saturn of the Sun and Mars, in Taurus and Pisces: of Venus and Mercury, in Aries and Gemini, of Jupiter and Mercury, in Taurus and Cancer, and a Conjunction of Jupiter and Venus, in Taurus. The motion of Armies out of one Country into another, and many Inconveniences happen in some Places, by Martial Undertakings: notwithstanding some seeming Overtures now in Foot, for the composing of differences, and reconciling of National Debates.

Many cold Storms of Hail and Rain, at the beginning of this Month, &c.

Left Quarter, the 8 day, 49 minutes past 10 at Night.  
 New Moon, the 16 day, 41 minutes past 2 Morning.  
 First Quarter, the 22 day, 17 minutes past 4 afternoon.  
 Full Moon, the 30 day, 15 minutes past 10 before noon.

**T**HE *Heavenly Bodies* in this Month of June,  
 are moderately disposed: There are five  
 Sextile Aspects of them therein: and *Conjunctions* and  
 Oppositions: The *Sextiles* are, *Mercury* and  
*Venus* and *Jupiter*; the *Sun* and *Jupiter*; *Jupiter* and  
*Mercury*; and *Mars* and *Mercury*; in *Taurus*; *Jupiter* and  
*Saturn*; in *Scorpio*; and *Saturn* and *Venus*; in *Libra*.  
 The Oppositions of *Saturn* and *Venus*; in *Libra*  
 and *Scorpio*: And the Conjunction is of the *Sun*  
 and *Mercury*; in *Cancer*: On the 11th day the  
*Sun* comes into *Cancer*; but his *Ingress* is not at-  
 tended with any rough *Disasters*, only the before-  
 mentioned *Opposition* of *Saturn* and *Venus*. — Some  
 Things of a quiet and Nature and Constitution  
 seem now to stand in many parts of Europe: And  
 the Actions of these Times seem not so hastily car-  
 ried on, as in some Months past: Yet various Re-  
 ports seem to be abroad about some Nations Pro-  
 ceedings, and their present Designs; which if of  
 a peaceable Temper, will be well. However,  
 Martial Men seem employ'd in many Places.  
*Mars* now passes into *Taurus*. —

Seasonable Weather most part of this Month; yet  
 many heavy Storms &c. will happen therein now  
 and then.

Last Quarter, the 8 day, 4 minutes past 1 afternoon.  
 New Moon, the 14 day, 53 minutes past 9 morning.  
 First Quarter, the 22 day, 46 minutes past 1 morning.  
 Full Moon, the 30 day, 32 minutes past 1 morning.

# July's Planetary Translations and Observations.

*day 22, 6 afternoon Jupiter*  
*Some day at 10. at eight Mars*  
*13 day at 6 Morning Venus*  
*Some day at 11: night Mercury*  
*13 day at 4 Morning Saturn*

*The*

*is with the Moon.*

*Saturn now becomes direct in Motion in the Two and twelfth degree of Scorpio: And there is a Conjunction of Jupiter and Mars, in Taurus; a Trans. Aspect of the Sun and Saturn, and of Saturn and Mercury, in Cancer and Scorpio: A Sextile of Jupiter and Venus, Mars and Mercury, and of Jupiter and Venus, in Taurus and Cancer: An Opposition of Saturn and Mars, in Taurus and Scorpio: And a Quartile of the Sun and Jupiter, in Leo and Taurus, &c. Some of these Configurations are of importance, and their Effects may be accordingly, viz. the Conjunction of Jupiter and Mars, Opposition of Saturn and Mars; and Quartile, of the Sun and Jupiter: The other are of a more amicable Disposition. Armies and Soldiers may now be busy; and some material Action may now happen in some Places: Battels, Robberies, Pyracies, and hasty and unruly passages, and other Enormities, seem signified by the said Opposition of Saturn and Mars in this Month, in those parts of Europe, under the Constellations of Taurus and Scorpio: It being of an unpleasant and turbulent Signification, &c.*

*Many heavy Storms in this Month, in many Places, with Thunder and Lightning, great Hail-stones, &c.*

1691. August hath xxxi. Days.

Full Quarter, the 7 day, 9 minutes past 1 in the Morning.  
 New Moon, the 13 day, 9 minutes past 4 in the afternoon.  
 First Quarter, the 20 day, 11 minutes past 1 in the afternoon.  
 Full Moon, the 27 day, 12 minutes past 5 in the afternoon.

Wednesday 20 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Thursday 21 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Friday 22 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Saturday 23 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Sunday 24 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Monday 25 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Tuesday 26 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Wednesday 27 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Thursday 28 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Friday 29 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Saturday 30 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Sunday 31 Aug. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Monday 1 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Tuesday 2 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Wednesday 3 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Thursday 4 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Friday 5 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Saturday 6 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Sunday 7 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Monday 8 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Tuesday 9 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

Wednesday 10 Sept. 11:30 am. 1:30 pm. 3:30 pm. 5:30 pm. 7:30 pm. 9:30 pm.

**O**N the 23<sup>d</sup> day of this Month, there will be a  
 eclipse of the Sun, between five and six of the Clock  
 at Night, in the very beginning of *Virgo*; which (if the  
 Air favours us) may be seen here in *England*, and a great  
 part of the Sun's Body may be *darkned*; but seeing it  
 happens within *40<sup>0</sup>*, of the *horizons*, of the Sun, see-  
 ing, it may not be wholly observed, which makes me  
 omit the interting here the *Type* thereof. *Mars* now  
 comes into *Gemini*, and *Jupiter* becomes retrograde, in  
 the 14<sup>th</sup> degree of *Taurus*; and here is a *Quintile* Aspect  
 of *Jupiter* and *Mercury*; and of *Jupiter* and *Venus*, in  
*Taurus* and *Leo*; of the Sun and *Saturn*, *Saturn* and  
*Mercury*, and *Saturn* and *Venus*, in *Leo* and *Scorpio*.  
 Of the Sun and *Mars*, in *Gemini* and *Virgo*: A Con-  
 junction of the Sun and *Mercury* in *Leo*. A *Trine* of *Sal-*  
*turn* and *Venus*, in *Cancer* and *Scorpio*; of *Jupiter* and  
*Mercury*, and of the Sun and *Jupiter*, in *Taurus* and  
*Virgo*. The Planets being now in's very active  
 Condition, their Effects may be accordingly. Many hu-  
 mane Actions of consequence now. Much business be-  
 among some European Nations: War, and its attendant,  
 afflict some Countries, Fight, Skirmishes, inquiet Do-  
 ings, &c.

Unsettled Weather often in this Month: with  
 great Claps of Thunder, and Lightning, &c.

B 4 September.

1691-1710 September hath xxx. Days.

Left Quarter, the 5 day, 3 min. past 11 before noon.

New Moon, the 13 day, 16 minutes past 1: Morning

First Quarter (the 10 days) 6 min. past 6 Morning

Full Moon, the 27 day, 11 min. past 9 morning.

September's Planetary Translations, and Observations.

Monday the 2d day at 12 in the afternoon *Jupiter*  
 Tuesday the 3d day at 1 in the night *Mars*  
 Wednesday the 4th day at 1 in the morning *Venus*  
 Thursday the 5th day at 8 at night *Mars*  
 Friday the 6th day at 1 in the morning *Saturn*  
 Saturday the 7th day at 3 in the afternoon *Jupiter*

**T**he Effects of the Configurations of the Planets, in August past, may at this time, operate in many Parts of the World; and do seem to be of some material Concernment, in relation unto some Mundane Translations, &c. — The 1st day of this Month, the Sun enters *Libra*, and the Aequinoctial Quarter Astronomically begins: This His present ingress, is not attended with any Aspects of the Planets of any Consequence; there being but very few in this Month. Here is only a Sextile Aspect of the Sun and *Saturn*; and of *Saturn* and *Venus*, in *Virgo* and *Scorpio*: A Trine Aspect of *Mars* and *Mercury* in *Gemini* and *Libra*; of *Jupiter* and *Venus* in *Taurus* and *Virgo*; and a Quarile Aspect of *Mars* and *Venus*, in *Gemini* and *Virgo*. The Actions, and Undertakings of some Countries, &c. now are various: Somethings formerly in agitation may now break forth, and be manifested: and some military Concernments may happen, &c. —

Seasonable and moderate Weather most part of this Month of September —

October

1691. October hath xxi. Days.

Last Quarter, the 4 day, 45 minutes past 6 at Night.  
New Moon the 11 day, 7 minutes past 1 Afternoon.  
First Quarter, the 19 day, 12 minutes past 1 Morning.  
Full Moon, the 26 day, 32 minutes after Midnight.

# October's Planetary Transactions and Observations

The	13 day at 5 Morning Mercury	is with the Moon
	14 day at 4 Afternoon Jupiter	
	16 day at 4 Afternoon Jupiter	
	30 day at 9 Morning Mars	

**I**N this Month of October, the Planets & Bodies are much employed; and many *mutual aspects* of them do now appear; and some of them seem to be of *unusual Significations*. There is now two *Oppositions* of *Jupiter* and *Mercury*; an *Opposition* of the *Sun* and *Jupiter*; and of *Jupiter* and *Venus*; In *Taurus* and *Scorpio*; A *Conjunction* of the *Sun* and *Mercury*, and of *Venus* and *Mercury*, in *Scorpio*; A *Trine* of the *Sun* and *Mars*; and two like *Aspects* of *Mars* and *Mercury*, in *Gemini* and *Libra*: And now *Saturnus* is passing out of *Scorpio* into *Sagittary*: And *Mars* becomes *Retrograde*, in the *Nine and twentieth degree* of *Gemini*. Many *Rumours* and *Reports* in this Month, touching the *Designs* and *publick Affairs* of some *European Countries* and *Cities*: And some *crosses* and *untoward Proceedings*, may put the *Inhabitants* of some *Places* into *fears* and *disturbances*: And some *difficulties* may now appear, both at *Sea* and *Land*.

*Wet* and *windy Weather*, may be expected very often in this Month, according to the *present Significations* of the *Stars*.

November

Last quarter, the 3 day, 45 minutes past 1 morning.  
 New Moon, the 9 day, 18 minutes after mid-night.  
 First quarter, the 17 day, 17 minutes past 9 at night.  
 Full Moon, the 25 day, 19 minutes past 2 afternoon.

**T**his Month begins with an *Opposition* of the *Sun* and *Jupiter*, and *Mars* and *Mercury*, in *Gemini*

and *Sagittary*; whose *Effects* will be manifested in those Places that are under those *Constellations*

There is now also a *Trine* Aspect of *Jupiter* and *Venus*, *Jupiter* and *Mercury*, and *Jupiter* and the *Sun* in *Taurus* and *Libra*: And *Jupiter* and *Mercury* in *Capricorn*: And *Jupiter*, having been for some time *Retracted*, now becomes *direct* in *Mercury*, in the fourth degree of *Taurus*. The Year now ends, and the *Solar* admits of no great *Alteration* in the *Weather* admitting many false Rumours may be abroad, and Martial differences may break forth, if not some sudden Furies, fury and rebellions, or Comotions, &c. — in some Places, under *Gemini* and *Sagittary*, and some difficulties, and inconveniences of a *Military* Nature, and various *Transactions* may there appear —

Seasonable Weather in this Month: *South* of *Thunder* in some Places; and *very* great *Winds*, &c.

*Deo Gloria*

# *Apocaliptical Observations, &c.*

For the Year 1691.

By William Anderton, Student in Astrology.

But when ye shall hear of Wars and Commotions, be not terrified: for these things must first come to pass; but the end is not by and by: Then said he unto them, Nations shall rise against Nation, and Kingdom against Kingdom: And great Earth-quakes shall be in divers places, and Famine and Pestilence, and fearful Signs, and great Signs shall there be from Heaven. And then shall be Signs in the Sun, and in the Moon, and in the Stars; and upon the Earth, Distresses of Nations, with Perplexity, the Sea and the Waves roaring, Mens Hearts failing them for fear, and for looking after those things which are coming on the Earth: for the Powers of Heaven shall be shaken. For as a snare shall it come on all them that dwell on the Face of the whole Earth. Watch ye therefore, and pray always, that ye may be accounted worthy to escape all these things that shall come to pass, and to stand before the Son of Man, S. Luke, Chap. 21. ver. 9, 10, 11. 25, 26, 28, 35, 36.

THE Year, 1691. is now coming upon us; of the which Year, (by the goodnets of God) I do here write: and the Years 1692. and 1694. draw near, and some other Years are not very far off, wherein some Learned Men have conjectured, that some miraculous Changes and Alterations will happen in the World: as may be seen in *Maffius his Theaurus Chronologicus*, cap. 30, & 54, &c. The Lord Napier's 14th. Proposition in his Book upon the *Revelations of S. John*; *Nostradamus's* Prognostications, and others. — That the World had a beginning, I do verily believe, and also that it shall be dissolved, and have an end, when the Almighty God, in his good Pleasure, shall think fit; (and some have conjectured that the last Age thereof, is at hand.) But the certain time of its end, no mortal Man

## *Astral Observations, 1691.*

can discover, no, the very Angels of Heaven know not the time thereof, *St. Matth. chap. 24. ver. 36.* However, great Signs, and Wonders shall happen (as the Holy Scriptures tell us) before its final Dissolution in the Heavens, Air, Earth, Seas, &c. with distress of Nations, Wars, Commotions, Earthquakes, and other Calamities, and unexpected Afflictions. — *St. Peter saith in his second Epistle, chap. 3. ver. 10. The day of the Lord will come as a thief in the Night, in the which the Heavens shall pass away, with a great Noise, and the elements shall melt with fervent heat, the earth also, and the works that are therein, shall be burnt up.* —

The Eclipses of the two great Luminaries of Heaven, happening in this present Year, 1691. will be two, and they both of the Sun (there will be none of the Moon); the first of them will happen on the 18th. day of February, about our 3 of the Clock in the Morning, therefore invisible as to us, as I have before hinted in that Month's Observations this Year. The other Eclipse will be on the 13th. day of August, about an hour or more, before the Sun's Setting; some part of this Eclipse (perhaps) may be seen in England. But I rather think, 'will not be much observed here: 'Tis mentioned in my Observations on the said Month of August this Year, and will be further considered, afterwards, by me here in the Summer Quarter of the same — And so I proceed to speak of the Positions, and Configurations of the Celestial Bodies at the Sun's Ingresses into the Cardinal Points of Heaven, in this present Year, 1691. to be observed. Of which the Position of Heaven, at the Ingress of the Sun into Capricorn, in December, 1690. is the first in order. — The Scheme whereof doth hereafter follow —

**U**Pon Thursday the 13th. day of December, 1690. about four minutes past seven of the clock in the Morning, the Sun enters Capricorn: at which time, the fifteenth degree of Sagittary, ascends in our Horizon, and the seventeenth degree of Libra, is upon the Cusps of the Median Cusp: the one, viz. Sagittary, being of the fiery Trigon, and the other of the Airy. The Planetary Bodies are in several Positures,

# Astral Observations, 1691.

positions, the Planet Saturnus in the first and twentieth degree of *Scorpio* in the twelfth House: *Venus* in the third House, just leaving of *Pisces*, and going into *Aries*: *Mars* is

In the seventh degree of *Sagittarius*, in the twelfth House; the *Sun* and *Mercury* in the Ascendant (*Mercury* being in the eighteenth degree of *T*). *Venus* is in the second House, in the twelfth degree of *Aquarius*: *Dragon's Head* in the third House, in the twelfth degree of *Pisces*; and the *Moon* in Conjunction with the *Dragon's Tail*, in the sixth House, in the twelfth degree of *Virgo*. — *Saturn* is in a Watry Constellation: *Mars* and *Mercury* in Signs of the fiery Triplicity: *Jupiter* in near the same Triplicity also — *Venus* is in an *Air Sign* and the *Moon* in an *Earthy*, separating from a Quatile Aspect of *Mars*, and applying to a Quatile Aspect of *Mercury*. — None of the Planets are considerably posited, as to their Essential Dignities,

the having little or no Fortitude wherein they are: Three of them are above the Earth, viz. Saturn, Mars, and the Moon; Mercury is just rising, and so is the Sun: Jupiter and Venus are under the Earth.

This Ingress of the Sun is not attended with any rough Aspects of the Stars, there being nothing but a Quartile of the Sun and Jupiter: which hath no great signification, as unto Mundane Transactions. What is most to be disliked at the said Ingress, is the position of the Moon with Cancer Draconis, in the ninth House; and of ♄ and Mars (called by Astronomers, the two Insultants) in the twelfth House; which both ♄ (as they say) of no pleasant Nature or Disposition; but both signification of quarrels, Families, and Debates. The said Position of those two Planets therein, do seem to forebode few things of a Clandestine Nature, and Mischievous, or Pernicious Actions and Undertakings, in the World: Wars, Plots and Contrivances; and also, to such as are signified by them, Griefs, and Melancholy Circumstances and Inconveniences, Losses and many Difficulties, &c. — Diseases in the greater sort of Cattle, as Horses, Cows, Balloeks, &c. — Haly hath, in his eighth Book, de *Judicio Astorum*, p. 510. That when Saturn shall be in a mean posture, in the twelfth House (as now he is) — *fatigabunt homines, & habebunt multum in moribus, & accident in illo climate damna & occasiones de viis, & malas inter homines voluntatis* and also in pag. 371. He saith, *Quando Mars fuerit in duodecima, accidunt genti metum & damna multa à suis inimicis, & fundunt inter seipos sanguinem, & rixas alent.*

What is chiefly to be observed, as touching the Influence of the Planets, at this aforesaid Solar Ingress, is, the late conjunctions of them, in November, 1690. Some of whose Effects (in all probability) will operate at the beginning of this Year, 1691. viz. in the Months of January, February, and March: those Conjunctions seemed to have some considerable Significations, they happened all in Scorpio, a Constellation of the Watry Triplicity, and Sign, wherein the Planet Mars is much concerned: so that Buinesses (for the most part) of a martial Nature seem, by them, portended both

# Astral Observations, 1691.

a Sea and Land; also great Floods, Inundations, and Over-  
flowings of the Sea; Battels, Sea-fights, violent Storms,  
dangerous Voyages, Piracies, Robberies, unruly Actions and  
Proceedings, and other Enormities, in diverse Parts of the  
World, under the said Sign, wherein the said Conjunctions  
happen'd, and its opposite Sign. — But I proceed to the In-  
gress of the Sun into *Aries*, this present Year, 1691. being  
the next Solar Ingress, in order, to be herein considered,  
the Scheme whereof doth here follow —

ON Tuesday the Twelfth day of March, this present Year,  
1691. about 24. minutes past seven of the Clock in the  
Morning, the Sun comes into *Aries*: at which time, the  
sixteenth degree of *Taurus* ascends in our Horizon, and the  
twentieth degree of *Capricorn* is on the Cusps of the Medium  
Caeli, both Signs of the Earthy Triplcity. *Saturn* is in the very  
latter end of *Scorpio*, in the seventh House, Retrograde; and  
the

## Astral Observations, 1691.

the Moon in the same House, in the thirteenth degree of Sagittary: Jupiter is in the fifteenth degree of Aries, in the twelfth House, the Sun is in the same House: Mars is in the thirteenth degree of Aquarius, and Venus in the sixteenth degree thereof, both in the eleventh House: and Mercury is in the beginning of Pisces, and Dragon Head in the seventh degree thereof, also in the same House: and the Dragon Tail is in the fifth House, in the seventh degree of Virgo.

The Moon is going from a Sextile Aspect of Mars, and is applying to a Trine Aspect of Jupiter, and a Sextile of Venus. And there is a Trine of the Sun and Saturn, a Sextile of Venus and Jupiter, and of Jupiter and Mars. Three of the Planets are in the fiery Triplacety, viz. Jupiter, the Sun, and Moon: Mars and Venus are in the Aery, Mercury in the Watry, and Saturn too, but Retrograde. All the Planets are above the Earth, at this Vernal Ingress, though Saturn and the Moon are not far from setting.

At this said Ingress of the Sun into Aries this Year, the Planets are very moderately disposed, and no Aspects attend it, but only such as are for the most part rather of agreeable Nature and Disposition than otherwise — as if Peace, and serene Actions were now the only Business portended by them, to happen in the Spring Quarter of this Year, and that some Nations and People, who have for some time past been labouring under martial Concernments, would, in this said Spring Quarter, be more at ease, and enjoy more Quiet than formerly, &c. Which seems signified by the aforesaid Sextile Aspect of Mars and Jupiter, and some other Configurations attending this said Vernal Ingress. — Yet, Saturn and Mars are applying to a Quadrant Aspect in Scorpio, and Aquarius, two fixed Signs, which seems to have signification of martial and unquiet Proceedings in some parts of the World, the more it is to be disliked, because Saturn is Retrograde, and is now in the seventh House, and the Moon is there also; and Mars is in a Humane Sign, and seeing He, viz. Mars, is in the Eleventh House, he signifieth Breach of Leagues and Amity betwixt some Nations, &c. — Haly saith, *Quando fuerit Mars in undecima non amabunt se Homines, nec associabuntur, nec habebunt amorem unus cum alio.* —

The

# Astr. Observation, 1661.

The Position of the *Sun* and *Jupiter*, in the twelfth House, seems also in some respect to be disliked, because of the un-  
 easie Natures of that House: for it is accounted, by *Astrologers*, of no good signification (as I have before hinted herein:) and seeing that *Saturn* is in the tenth House, at this said *Ver-  
 nal Equinox*, in *opposition* to the *Mercury*, his Influence may be of consequence to those Persons and Mundane Businesses unto which this Planet has relation. — Coughs, Agues, and other Infirmities of His Nature being thus signified to afflict many People in the Spring time of this Year: besides, in this *Quarter*, also, and in the Month of *March*, *April* and *May*, it's very probable that some remaining part of the *Effluvia* of the before-mentioned Conjunction of *Saturn* and *Venus* may, in some respect or other, be manifested at *Shrewsbury* and *Land*, which if they prove of a pernicious and noisier Nature, will be well. — And so I cease, in the next place, to the In-  
 crease of the *Sun* into *Cancer*, this present Year, 1661, being the Third of *Mercury*, in order, to be here considered. The Scheme whereof doth hereafter follow.

Upon Thursday the eleventh day of *August*, about 4 minutes past 9 of the Clock in the morning, this Year, the *Sun* leaves *Gemini*, and comes into *Cancer*: the *Mercury* being then in this posture, *viz.* five Degrees of *Virgo* ascends in our *Horizon*; and *eight and twenty Degrees* of *Taurus*, is on the *Cusps* of the *Medium Caeli*, or tenth House; both Signs of the *Earthy Trigon*. *Saturn* is near the fourth House, in the three and twentieth degree of *Scorpio*, Retrograde: *Jupiter* is in the seventh degree of *Taurus*; and *Venus* in the three and twentieth degree, and both in the ninth House: *Mars* is in the three and twentieth degree, and the *Moon* in the seven and twentieth degree of *Aries*, in the same House: the *Sun* is in the tenth House, and *Mercury* is in the eleventh, in fourteen degrees of *Cancer*, Retrograde. *Cauda Draconis* is in the Ascendant, in the second degree of *Virgo*; and *Cauda Draconis*, is in the seventh House, in the same degree of *Pisces*. *Mars* and the *Moon* are in a Sign of the fiery Tripli-  
 city: *Saturn* and *Mercury* are in Signs of the Watry; and

# Astral Observations, 1661.

Jupiter and Venus are in the Earthy Triplicity. All the Planets are at this Solar Ingress above the Earth, but Saturn The Moon is in Conjunction with Mars, and separates there

from to a Sextile of the Sun: Saturn and Venus are in Opposition, and no other Aspects of the Planets happen at this Ingress besides. — Mercury is Lord of the Ascendant, and Venus rules the tenth House. As unto the Essential Dignities of the Planets at this Ingress, Mars seems to have the Pre-eminence. —

There is at this said Solar Ingress, three or four things relating to the Stars, to be disliked, viz: the Position of *Standa Dragon* in the Ascendant; the Presence of Saturn Retrograde, so near unto the fourth House, in Opposition to the ninth, and Venus, ruler thereof, therein, and the Position of Mars and the Moon in the ninth House, and in Conjunction there,

these, in a *serp* and *oblique* Sign. — All which seem to denote, uncase, Matters and Difficulties of Sundry Matters, and Inconveniences to happen in the *Summer Quarter* of this Year, in some parts of the World under these Constellations, viz. *Aries, Taurus, and Virgo*, &c. — The *Position* of *Cauda Draconis* in the *Ascendant*, according to *Guido Bonatus*, pag. 599. de *Astronomia*. — *Significat pericula & Tribulationes*, &c. — And being in *Virgo*, according to the same Author, in pag. 590. of his said Book. — *Significat odium casum inter Divites atq; Magnates, & erunt Guerra & Diffensiones & Prælia inter eos*, &c. — And whether at this said *Solar Ingress* we admit of *Saturn* to be in the *fourth House* or no (seeing he lacks five degrees of the same) or in the *third House*, His present signification is not propitious, but shews the Ruine of Towns, Houses, and Buildings; Envy, Hatred, and Disturbance amongst Men, and that the Earth will not give her due Increase, or that the Fruits thereof will sustain some prejudice in the *Summer Quarter* of this Year, by contrary and unseasonable Weather or otherwise. — And as to the *Positions* of *Mars* and the *Moon* in *Aries*, in *Conjunction* in the *ninth House*, they seem to foreshew much danger in Travelling, Robberies, Pyracies, &c. — Warlike Actions and Negotiations; Differences about Religious Matters, and that there will be many Turnings and Windings in the Affairs of some Nations, and that some people will make many Journeys and Removes out of one place into another. — *Haly* saith, pag. 378. de *Judiciis Astrorum*, when *Mars* shall be in the *ninth House*. — *Significat multos Latrones & Prædones in itineribus*. — and be saith in pag. 394. *Si Luna juncta fuerit cum Marte, significat Rumores falsos, & Sanguinum effusiones, & Maledicta multa*. —

In this *Summer Quarter* of 1691. on the five and twentieth day of *July*, there will be an *Opposition* of *Saturn* and *Mars*, the one, viz. *Mars* being then with the *Pleiades*, or *Seven Stars*, and *Saturn* in *Opposition* unto that *Constellation*, whose *Effects* may be of some Consequence, both as touching the Weather at and about that time, and some time afterwards

wards, and also as unto the then Actions and Concernments of those Nations and People, that are under the Signs *Taurus* and *Scorpio*, wherein the said *Opposition* happens. It doth seem to import some sturdy doings both at Sea and Land, and military proceedings in the *Summer Quarter* of this Year, as Fights, Skirmishes, &c. — and much Thunder and Lightnings, and very violent Storms of Hail and Rain in many places, and turbulent Air, at or about the aforesaid time, in *July* this Year, when the said *Opposition* happens —

I do proceed and say, that in this said *Solstitial Quarter* also, (as I have herein hinted) there will happen a pretty considerable *Eclipse* of the Sun, viz. on the thirteenth day of *August*, which, perhaps, may be seen in *England*, (as I said before:) the Planet *Saturn* is then Lord of the *Ascendant* in the sixth House. The *Eclipse* happens in the first degree of *Virgo*; and *Mercury* is Lord thereof; and there is a *Quadrant Afflict* of *Mars* and *Him* at the same time, *Mars* being in *Geminis* in *Conjunction* with the Bull's Eye, an eminent fixed Star, but (as *Astrologers* say) of an unquiet and turbulent Nature. — This *Eclipse* may have some Important Effects. — *Proclus* saith, That, an *Eclipse* either of the Sun or Moon in *Taurus*, *Virgo*, or *Capricorn*, denotes a Scurcity of the Fruits of the Earth, and Corn, and also when in the first decanate of *Virgo* (as now) it hath some other more weighty signification, &c. — as may be seen in the works of the said *Proclus*, as also of *Junkins*, another Eminent and Learned *Astrologer*, &c. — And so I come in the next, and last place, to the Position of Heaven at the ingress of the Sun into *Libra* (at this time to be considered); The Figure whereof doth hereafter follow —

**U**Pon Sunday the thirteenth day of September this Year, about eighteen minutes past one in the Morning, the Sun enters the *Equinoctial Sign*, *Libra*, at which time, ten degrees of *Leo* ascend in our Hemisphere, and one and twenty degrees of *Aries* are on the Cusps of the Medium Caeli, or zenith, both Signs of the fiery Trigon, the one a fixed, and

# Astral Observation, 1691.

and the other 2. common Signs. The Sun is Lord of the 4. *pendants*, and Mars of the sixth House. Saturn is in the five and twentieth degree of *Scorpio*, in the fourth House, and

Mercury is also therein, in the four and twentieth degree of *Libra*: *Jupiter* is in the thirtieth degree of *Taurus*, in the *Medium Caeli*, *Retrograde*. *Mars* is in the twentieth degree of *Gemini*, in the eleventh House: *Venus* in the sixteenth degree of *Virgo*, in the second House: the Sun and Moon are in the third House, the Moon being in the thirteenth degree of *Libra*. *Caput Draconis* is in the seventh House, in the seven and twentieth Degree of *Aquarius*: and *Cauda Draconis* in the Ascendant, in the same degree of *Lio*: the Moon is applying to a *Trine Aspect* of *Mars*, and *Conjunction* of *Mercury*, *Saturn*, the Sun, *Moon*, *Venus*, and *Mercury* are all under the Earth. *Jupiter* and *Mars* are above the Earth. — The Planets at this *Autumnal Ingress*, as unto their *Essential Dignities*,

*Dignities*, are but indifferently posited, nor are their significations much in the Houses wherein they lie (at this said Ingress) as in relation unto Humane Negotiations. The Position of *Cauda Draconis* in the Ascendant, seems to have some such signification as at the beforementioned Ingress of the Sun into Cancer—and the Position of *Saturn* and *Mercury*, in the fourth House, in Opposition to the tenth, seems somewhat to be disliked, and doth seem to fore-tell many cold Storms in this Autumnal Quarter, and very high Winds, if not some Earthquake in some Places, very prejudicial: and seeing the *Maor* is in the third House, and applying to the conjunction of *Mercury* in the fourth: It's the more confirmed, and also seems further to import, that many Rumours and various Reports will be spread abroad in this said Autumnal Quarter, and Months of *October* and *November*, about Publick Affairs and Transactions of several European People and Countries, &c.

There are but very few Mutual Aspects of the Planets, attending this said last Solar Ingress, only a Triet of *Mars* and *Mercury*, and of *Jupiter* and *Mercury*; and *Venus* and *Mars* are applying to a Quartile Aspect; but in this Autumnal Quarter, viz. in the Months of *October*, *November*, and beginning of *December*; there will happen very many Conjunctions, Oppositions, and other Configurations, (as I have particularly mentioned in those Months Observations this Year) of very eminent Importance, whose Effects may be considerable, in sundry parts of the World, and many things of Importance, both at Sea and Land, seem by them signified to happen in those aforesaid Month's, in many Places: very high Winds also and Boisterous Weather at Sea and Land: and many cold Storms, and much Snow or Rain seem signified by the said Configurations in *October* and *November*, this Year; and perhaps sudden Fires, Claps of Thunder, &c. may happen at the latter end of this Quarter, in some Places, if not some Comet or Blazing Star, or some unusual Sights in the Air. —

In this said Autumnal Quarter of this Year, viz. about the latter end of *October*, *Saturn* passeth out of the Sign *Scorpio* and

and comes into *Sagittary*. Having been in *Scorpio*, ever since the beginning of *November*, 1688. *Astrologers* use much to take notice and observe the removal of *Saturn* out of one *Sign* into another: because most commonly it hath been found that much alteration in the Air hath followed; and very eminent Contingencies as in relation unto Humane matters. — Those Places in the world under these two Constellations, viz. *Sagittary* and *Gemini*, may be concerned in one kind or other, by the Transit of *Saturn* through *Sagittary*. — He will continue therein all the two next Years, viz. 1692, and 1693. during which time it is very probable that those parts which are under the two aforesaid Constellations, may be sufficiently sensible of his Influence. — I conclude with the words of the Learned and Pious Bishop Hall, in his *Invisible World*, pag. 14. & 15. “When we are convinced of the wonderful magnitude of those goodly Stars, which we see moving in the firmament, we cannot but acknowledge, that if God had made but one of them, He could never have been enough magnified in his Power; but when our Sense joins with our Reason to force upon us withal an acknowledgment of the infinite numbers of those great Luminaries; now we are so far to seek of due Admiration, that we are utterly lost in the amazement of this stupendous proof of Omnipotence.

The Relation of the dreadful Earthquake, which happened in the Year 1690. in the Leeward Islands in America, as it came from Barbadoes, April 22 last past; as it was published in the London Gazette, N<sup>o</sup> 2570.

A Bout three weeks since, there were felt most violent Earthquakes in the Leeward Islands, at *Montserrat*, *Nevis*, and *Antigua*: In the two first no considerable Hurt was done, most of their Buildings being of Timber, but where there were stone Buildings they were generally thrown down, which fell very hard on *Antigua*, most of their Houses, Buildings, Sugar-works, and Wind-mills being of stone. This Earthquake was felt in some Places of this Island,

Island, but did no manner of Hurt to Men or Cattle, nor was any lost in the Leeward Islands, It happening in the day time: It is reported to have been yet more violent in *Martinique*, and other French Islands, and several Sloop who came from *Nevis* and *Antigua*, passing between *St. Lucia* and *Martinica*, felt it at Sea; the Agitation of the Water being so violent that they thought themselves on Rocks or Shelves, their Vessels making as if they would break in pieces; and others passing by a Rock, an uninhabited Island called *Redunda*, found the Earthquake so violent there that a great part of that Rocky Island split and tumbled into the Sea, and was there sunk, making a great noise as of many Cannon, and a very great cloud of Dust ascending into the Air, at the fall. Two very great Comets have lately appeared in these parts of the World, and in an Hour and a quarter's time, the Sea ebbed and flowed to an unusual degree three times. Thus far the Relation.

Philosophers and Naturalists tell us, there be four causes of Earthquakes, viz. *Efficient, Material, Formal, and Final*. As unto the *Efficient, Material, and Formal* causes, I shall refer you to the fourth Book of *Pliniodus, de Historis*, and the works of others who have very sufficiently and learnedly wrote thereof, and only touch at their *Final* cause, (wherever they happen) and that without dispute is (in the words of the Learned *Sir George Wharton* in his *Hemerologium*, for the Year, 1656. speaking of the Earthquake, which in the Year, 1656. happened in some parts of England) a sign of an angry God, justly provoked by the Scarlet Sins of a sinful People, according to that of *King David*; *Commota est, & contremuit Terra, fundamenta Montium conturbata sunt, & commota sunt, quonia iratus est deus.* The Earth shock and trembled, the Foundation also of the Hills moved and were shaken, because he was wroth. I shall end my present discourse upon this Subject with the words of the Prophet *Jeremiah*, c. 10. ver. 16. *The Lord is the true God, he is the living God, and an everlasting King; at his wrath the Earth shall tremble, and the Nations shall not be able to abide his indignation.*—

*lastly*, as unto the appearance of the two *Comets*, before mentioned in the Relation: It's probable, such sights, or omens of another Nature, may appear in those parts of the World before the publication hereof, or in this Year, 1691. As unto the Effects of *Comets*, they have always in former Ages been found to be of wonderful concomitant unto Nations, Cities, and Countreys, in many respects, and we have also sufficiently known them so, even in our time:

*Nihil Comites qui malum nullum ferat.*

*William Andrews.*
